

ATEVAL welcomes the GALACTICA participants to join the learning expedition in the Valencia region. Discover the Valencian Innovation ecosystem

Day 1 - 18th October

Day 1 - 18th October	
Time	Activities
9:00-9:15	Welcome and registration
9:15-10:00	Presentation of UPV and visit to the laboratories of the Higher Technical School of Design Engineering (Degree in Aerospace Engineering and UNIVERSITY MASTER IN AERONAUTICAL ENGINEERING)
10:00-11:00	Presentation of UPV actions to stimulate entrepreneurship and challenge resolution by students. Pitch of groups or start-ups related to aerospace, satellite data, and additive manufacturing. https://stratolloon.com/ https://www.idstopografia.com/ https://bemore3d.com/
11:00-11:30	Coffee break & networking
11:30-12:00	Presentation of spin-offs UPV related to Galactica sectors: lkasia technologies Vlc photonics https://fentiss.com/
12:30-14:00	Presentation of technological challenges in radio frequency communication and visit to the ESA laboratory at the UPV. Val Space Consortium - Visit the immersive technology laboratories of the Institute for Research and Innovation in Bioengineering I3B.
14:00-15:30	Lunch
15:30-18:30	Cross-sectoral fertilization Workshop AITEX Challenges Presentation In this workshop, people from the start-up environment, students of the master's degree in engineering, and local companies will participate in a guided process to work in groups to provide solutions to specific challenges.
>18:30	Networking event in Valencia city center Dinner

Day 2 19th October

Day 2 - 19th October	
Time	Activities
9:00-14:00	Visit to the two plants (Picassent and Alcuia) of TEJIDOS ROYO . It is a textile company founded in 1903, with a vertical business model that includes: <ul style="list-style-type: none">•Spinning•Indigo•Weaving•Piece dyeing•Special finishing
14:00-15:00	Lunch
15:00-17:00	Visit to Aidimme 's additive manufacturing plant.

Description Valencia learning expedition

Take part in an enlightening 2-day journey where you can discover the Valencian Innovation ecosystem.

On the first day, we will connect you with inspiring innovators from UPV ready to share their experience and best practices – from disruptive start-ups to innovative companies, entrepreneurs, research centers, and universities departments.

Get inspired by the workshop to foster co-creation towards revolutionizing GALACTICA's second call for proposals among textile, advanced manufacturing, and aerospace.

In the evening over a cup, relax yourself and meet other colleagues, having a drink in good company.

On the second day, we will visit a textile company with a vertical business model and a research center focusing on metal additive manufacturing and developing new applications for composite and modified materials.

We are waiting for you!
